So that till the centenary year of Independence (15 August 2047) in the coming times, the farmers of our country should feel proud of being their own farmers.

StartUp India

The Startup India initiative of the Government of India envisages building a robust Start-up ecosystem in the country for nurturing innovation and providing opportunities to budding entrepreneurs.

Seed Fund

Easy availability of capital is essential for entrepreneurs at the early stages of growth of an enterprise.

Funding from angel investors and venture capital firms becomes available to startups only after the proof of concept has been provided. Similarly, banks provide loans only to asset-backed applicants. It is essential to provide seed funding to startups with an innovative idea to conduct proof of concept trials.

The Indian startup ecosystem suffers from capital inadequacy in the seed and 'Proof of Concept' development stage.

The capital required at this stage often presents a make or break situation for startups with good business ideas.

Many innovative business ideas fail to take off due to the absence of this critical capital required at an early stage for proof of concept, prototype development, product trials, market entry and commercialization.

Seed Fund to an eligible startup by the incubator shall be disbursed as follows:

- Up to Rs. 20 Lakhs as grant for validation of Proof of Concept, or prototype development, or product trials. The grant shall be disbursed in milestonebased installments. These milestones can be related to development of prototype, product testing, building a product ready for market launch, etc.
- Up to Rs. 50 Lakhs of investment for market entry, commercialization, or scaling up through convertible debentures or debt or debt-linked instruments.
- Seed fund shall strictly not be used by startups for creation of any facilities and shall be utilized for the purpose it has been granted for.

About PMEGP Scheme

Provision of sustainable and continuous employment to a wide segment of prospective and traditional artisans, unemployed youth in rural and urban areas by establishing micro-enterprises for employment generation. Smooth flow of credit to the micro sector by facilitating the participation of financial institutions.

EDP on New StartUp

EDP is an effort of converting a person to an entrepreneur by passing him through thoroughly structured training. Startup India is a flagship initiative of the Government of India, intended to build a strong eco-system for nurturing innovation and Startups in the country that will drive sustainable economic growth and generate large scale employment opportunities. The Government through this initiative aims to empower Startups to grow through innovation and design. In order to meet the objectives of the initiative, Government of India Action Plan that addresses all aspects of the Startup ecosystem has been announced. With this Action Plan the Government hopes to accelerate spreading of the Startup movement:

- From digital/ technology sector to a wide array of sectors including agriculture, manufacturing, social sector, healthcare, education, etc.; and
- From existing, tier 1 cities to tier 2 and tier 3 cities including semi-urban and rural areas.

The details of the required documents will be provided during the training.
